NO SCREWS  
NEEDED

**01.** Attach the side panel (slanted top with a corner hole) to the back panel (plain with hooked pegs), ensuring hooks face up and the side slopes downward from the back.

**04.** Place the hut on its side and attach the remaining side panel, sloping down from the back. Leave it slightly loose to allow room for attaching the lid.

**02.** Attach the front panel (logo facing out) to the side panel using the hooked pegs, ensuring they face upwards.

**05.** Turn the hut upright and attach the lid by inserting its pegs into the hinge holes, aligning the back of the lid with the hut.

**03.** Slide the base panel between the back and front panels, with pegs facing forward and backward, and slot them into the holes.

**06.** Ta-da! Your new milk hut is now ready to use. Simply leave it on your doorstep ready to be filled with your goodies.
